Siegfried Eggert

Grizzly Research

We are excited to present the Chief Executive Officer of [Grizzly Research](#), Siegfried Eggert, as our final Top-50 feature. Grizzly Research focuses on generating “differentiated research insights on publicly traded companies through in-depth due diligence.” Their US-based team composed of accountants, analysts, and engineers frequently find management teams making “conscious efforts to hide negative aspects from the public, and amidst Wall Street’s perpetual buy-rating machine there is no one to call them out.” As a result, Grizzly Research feels obligated to publish their bearish views. They also use this research in order to consult on a “range of M&A transactions, and structured investments.” Their other capacities include: forensic accounting analysis, financial analysis and modeling, channel checks, background checks, financial/deal structuring, as well as local expertise and network access in China.

Prior to owning and operating Grizzly Research, Siegfried graduated from Hanzehogeschool Groningen / Hanze University of Applied Sciences Groningen with a bachelor’s degree in finance and accounting. However, Siegfried returned to school immediately in pursuit of a Master’s in Finance which he successfully obtained from the University of Rochester. It was here at the University of Rochester - Simon School of Business where he gained his first experience as an analyst as a part of the school’s venture capital fund. Through this experience, Siegfried went on to work for [Geolvesting LLC](#) as a full-time analyst under Maj Soueidan, a former Top-50 feature! Check out his previous write-up [here](#).

As we wrap up our final Top-50 feature, you can keep up to date with Siegfried’s most recent endeavors via his personal [LinkedIn](#) or through Grizzly Research’s official [Twitter](#) account. Please note that this article only contains publicly available information.
